Mecsoft Products adopted by Leading Indian Engineering Institutions

FOR IMMEDIATE RELEASE

Irvine, CA – March 06, 2006: MecSoft Corporation, developer of industry leading **VisualMill** and **RhinoCAM** CAM software, announced the use of VisualMill 5.0 in several Engineering institutions in India. The software will be used as part of the curriculum with which students can train in CAM, CAD (computer-aided design), and CNC (computer numerical control). The software grant will allow students to learn CNC technology in mold-making, tool-and-die industry and prototype engineering.

Colleges adopting the software are the PSG College of Engineering in Coimbatore, Christ The King Polytechnic College, Coimbatore and Thiagarajar College of Engineering in Madurai. Additional Memorandum of Understandings (MOU) has been finalized with Anna University of Chennai, India to implement MecSoft's products in the Department of Manufacturing Engineering (DOME). MecSoft is also in discussions with various other engineering institutions and design institutes in India for the purposes of implementing its products for instructional use.

"With the rapid expansion of the Indian economy there is a lot of demand for quality design and engineering education with special emphasis for state of the art tools and technology. We are happy to be working with our partners in India in offering our products for the educational as well as the commercial markets in India. We see this is as a strategically important market for MecSoft", says Joe Anand, President of MecSoft Corporation.
