Press Release

MecSoft and Roland DGA Collaborate to Provide Affordable Integrated CAM Solution for Jewelers

Irvine, CA, September 15, 2009: MecSoft Corporation, the world's leading developer of [affordable CAD/CAM software](#) solutions, and [Roland DGA Corporation](#), a pioneer in the development of innovative digital technology, announce their OEM agreement and release of [JewelMILL](#) CAM software, to be used by jewelers in conjunction with Roland JWX-30 milling machines. The packaging of JewelMILL with Roland's existing JWX-30 provides customers a combination of easy-to-use, powerful, and affordable CAM software technology that also delivers strong business value.

"It is my pleasure to announce the release of JewelMILL, an OEM product from Roland DGA, that is based on our VisualMILL technology" states Joe Anand, CEO and President of MecSoft. He goes on to explain, "JewelMILL, coupled with the superior machining capabilities of Roland mills, offers not only ease of use but also better quality toolpaths and faster machining speeds. We are very excited about this product launch and are looking forward to working with Roland in this, and other, initiatives in the near future."

Based on MecSoft's proprietary VisualMILL[®] technology, JewelMILL's powerful wizard based user interface offers support for 4-axis milling and simulation of finished 3D models. Users can quickly create tool paths through a simple 6 step production process with little to no learning curve, thus allowing jewelers to cut their wax models within minutes of creation. By utilizing the original model data, instead of converting smooth data to rough mesh data, JewelMILL provides faster model production with tighter dimensional accuracies and smoother surface finishes.

"This new software package developed by MecSoft combines powerful Computer Aided Manufacturing software with Roland's legendary ease of use" says Pedro Gonzalez, Product Manager – 3D Milling & Scanning Products for Roland DGA Corp. "It augments our existing JewelStudio software and JWX-30 milling machine to provide jewelry designers the ability to transform their 3D models to wax models with unparalleled speed and precision."

Roland DGA will be including JewelMILL with each new JWX-30 milling machine, as well as offering it as a standalone package for existing JWX-30 customers. It will be distributed exclusively through Roland DGA Corp. Visit the Roland DGA JWX-30 website at

www.rolanddga.com/products/milling/jwx30 or contact your Roland DGA representative for more information.

About MecSoft Corporation

MecSoft Corporation, a California based company, is a leading developer and provider of [affordable CAD/CAM software](#) solutions for the CNC machining industry. Their products are used for manufacturing parts in a wide variety of industries including aerospace, automotive, education, general machining, jewelry, and mold & die. For further information about MecSoft Corporation, OEM opportunities, or any of their products, please call 949-654-8163, visit www.mecsoft.com, or email sales@mecsoft.com.

About Roland DGA Corporation

Roland DGA Corporation and affiliated companies are pioneers in the development of innovative digital technology for creative professionals. From its inception as part of world-renowned Roland Music, Roland DGA Corp. has introduced an award-winning product line that continues to set new standards for precision, reliability and performance. Professionals worldwide rely on Roland solutions everyday in the sign, grand-format, sublimation, UV inkjet, digital graphics, vehicle graphics, fine art, photography, flexo, label, engraving and 3D modeling industries.

Headquartered in Irvine, CA, Roland DGA Corporation serves as the U.S.-based marketing, distribution and sales arm of Roland DG Corporation in Hamamatsu, Japan. Affiliated companies include Roland Corporation US in Los Angeles, CA and Rodgers Instruments LLC in Hillsboro, OR. Roland DG Corporation is listed on the Tokyo Stock Exchange.

Roland DGA is ISO 9001:2000 certified, and Roland DG is ISO 9001:2000 and 14001:2004 certified. For more information on Roland DGA products, please call (800) 542-2307 or visit the Web site at www.rolanddga.com.
